Introduction

Engage your students with this interactive **Pumpkin Life Cycle unit!** Perfect for hands-on learning, this resource allows children to explore the stages of a pumpkin's growth through fun cut-and-paste activities, posters, and booklets. It's an ideal tool for reinforcing science concepts in an engaging and memorable way.

What's Included:

- **Life cycle posters (color):** Available with and without stage labels.
- **Classroom big book (color):** A large visual resource perfect for group learning or wall displays.
- **Student cut and paste life cycle booklets (black and white):** Engaging booklets where students complete the life cycle by pasting the correct stages.
- **4 life cycle cut and paste worksheets:** Each worksheet focuses on a different aspect of the life cycle, from labeling stages to ordering the cycle.

How to Use:

- **Classroom big book prep:** Print all pages and bind them together with staples or a binding comb. This can also be used as a large wall display.
- **Student booklet prep:** Print and stack pages in order, staple together, or let students order and staple them independently. Provide the word boxes for students to cut and paste into the correct spots.
- **Worksheets:** Choose from four different activities focusing on missing words, ordering the cycle, and labeling each stage.

Answers for both the booklet and worksheets are found in the classroom big book.

Educational Benefits:

- **Life cycle knowledge:** Helps children understand the stages of an apple's life cycle, fostering early scientific thinking.
- **Science understanding:** Enhances knowledge of plant biology and life cycles, introducing key scientific concepts like growth, reproduction, and the stages of development.
- **Reading comprehension:** By identifying missing words and completing sentences, children develop their ability to understand and interpret informational text.

Happy Teaching :)

1

Pumpkin seeds are planted in the ground. They need the sun, water and air to grow.

4

Yellow flowers grow on the vine.

2

After a few weeks, a tiny sprout pushes up through the soil.

5

The flowers wither away. A small, green pumpkin grows where the flower used to be.

3

The sprout grows into a vine with many leaves.
