Introduction

This hands-on math activity helps children practice number recognition, counting, and matching quantities using ten frames. Each card shows a numeral alongside a ten frame, and students decide if they match by clipping a clothespin to the check mark or cross. With built-in self-checking, learners can work independently with confidence.

What's Included

- 20 number matching task cards (numbers 1–10 with true and false matches)
- Each card shows a large numeral and a ten frame with counters
- Answer area with check mark and cross for student responses

Preparation

- Print on cardstock and cut along dotted lines
- Laminate for durability
- Make it self-checking: place a small sticker or mark on the back of each card behind the correct answer
- Optional: punch a hole in the corner and store cards on a binder ring

How to Use

- Independent center: Students count the counters, compare with the numeral, and clip the correct answer.
- Small group: Teacher models counting strategies and students respond with thumbs up/down or use cards on a Match/Not a Match mat.
- Partner activity: One student answers while the partner flips to check and explains why.

Differentiation

- Support beginners: Focus on cards with clear one-to-one matches (e.g., 1, 2, 5, 10).
- Challenge learners: Use trickier mismatch cards and ask students to explain the mistake or create their own matching ten frames.

Skills Targeted

- Number recognition (1–10)
- Counting objects in ten frames
- Comparing quantities to numerals
- Fine motor practice with clothespins
- Independent self-checking skills

Teaching Tips

Have students count counters aloud to strengthen one-to-one correspondence. Use as a math warm-up, intervention activity, or exit ticket.

Happy Teaching :)

make this activity
self-checking by
adding stickers on the
back of the card

Make this a self-checking activity by placing a sticker on the back of each card behind either the tick (check mark) or cross.
