School Pegboard Patterns

This packet includes 20 school-themed pegboard picture mats. Children recreate familiar school objects while practicing fine motor skills, hand-eye coordination, color matching, and visual discrimination.

Each mat includes a large picture pattern, simple directions, and a word label. Use the mats for back-to-school fine motor centers, morning tubs, small groups, homeschool activities, or independent practice after a demonstration.

What you will need

- A square pegboard with at least 10 rows and 10 columns
- Colored pegs that fit your board
- Printed picture mats
- Laminating supplies or reusable pockets, if desired
- The mats can also be used with play dough, pom-poms, buttons, and other small materials.

Preparation

Print the mats on US Letter paper and laminate for durability.

To use a clear pegboard directly over a mat, print one page at 100% size and check that the board's holes line up with the printed grid. Adjust the print scale if needed, and test before printing and laminating the remaining pages.

When copying from a mat placed beside the board, the printed grid does not need to match the board's physical size.

How to use

1. Choose a picture mat and gather the pegs.
2. Place the mat beside the pegboard, or position a compatible clear board over the printed grid.
3. Match the peg colors and positions to the large circles. Large outlined white circles represent white pegs. Leave the holes represented by small black dots empty.
4. Compare the completed picture with the mat and adjust any pegs as needed.

If a peg color is unavailable, choose a substitute and use it consistently throughout the picture. For extra support, help children complete one row or a small section at a time.

Other ways to use the mats

- Play dough: Roll small balls in matching colors and gently press them onto the large circles.
- Pom-poms: Cover the large circles with matching pom-poms, using fingers or tweezers.
- Buttons or mini counters: Match the colors and place one piece on each large circle.
- Mini erasers: Place one small eraser on each large circle to recreate the picture's shape.
- Round stickers: Peel and stick matching colored stickers onto the large circles.
- Tissue paper: Scrunch small pieces into balls and glue them onto matching circles.

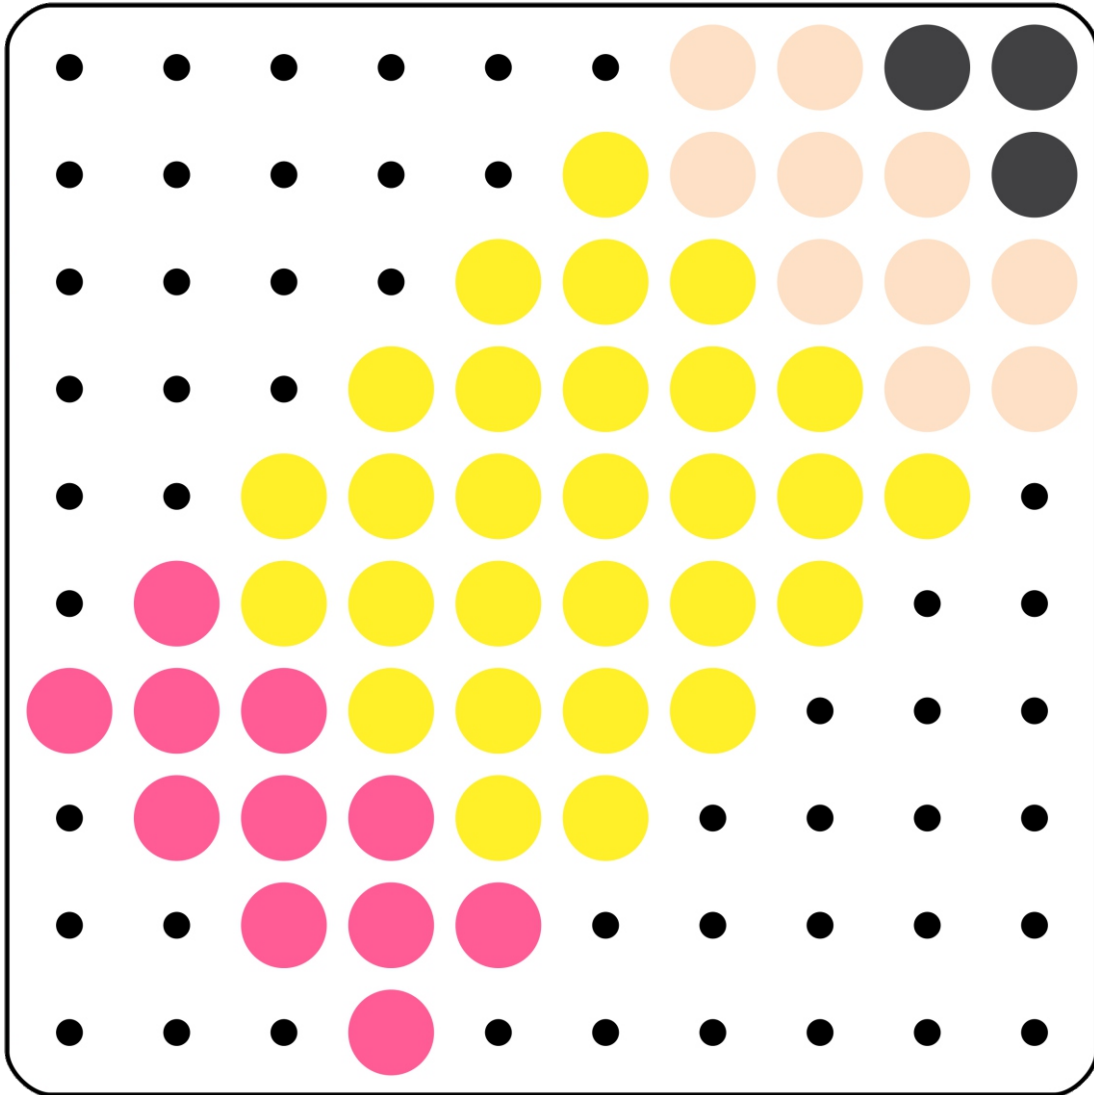

Use laminated mats or reusable pockets for loose materials and play dough. Use unlaminated copies for stickers and gluing. Choose materials that fit within the circles, and leave the small black dots uncovered.

Extend the activity by inviting children to name the picture, count the pieces of one color, or compare which colors they used most and least.

Happy Teaching!

Copy the picture. Leave the black dots empty.
